DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Titterington et al (US Patent 6,015,847).

Titterington et al disclose a phase change ink composition comprising a phase change carrier composition, at least one compatible phase change magenta colorant material, and at least one organic sulfonic acid compound (abstract and col. 2 line 66-col. 3 line 3). The reference further discloses that the magenta colorant materials are rhodamine-type colorants such as Solvent Red 49 (fluorescent) and Solvent Red 127 (non-fluorescent) (col. 3 lines 40-47 and col. 9 lines 30-35). See examples. The composition as taught by Titterington et al appears to anticipate the claimed invention.

Allowable Subject Matter

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The references alone or in combination fail to teach an ink composition that is solid at room temperature and liquid at a higher temperature that comprises two

compatible dyes that are anthraquinone dyes specifically fluorescent Solvent Red 149 and non-fluorescent Solvent Red 172.

Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.
